The artistry of classic sculpture and modern hardwood have been joined. Bernini introduces a dazzling "snakeskin" texture to hardwood, born of fine French Oak, and updating today's on-trend reclaimed looks in the process. Machines simply can't produce such captivating texture, so Bernini floors are etched, aged and sculpted by hand. The meticulously multi-step process graces every surface, edge and end, creating a look at home for graceful everyday living or elegant entertaining. Naturally, Bernini comes in a full spectrum of trendy colors.
